Dr.coffee M10-OS

M10-OS Fully Automatic Coffee Machine: One-touch operation for fast milk coffee preparation, auto cleaning to save time and effort, large-screen control for ease of use, and smart IoT connectivity for convenient management. Compact and ideal for office environments, it combines convenience and practicality to deliver a high-quality, efficient coffee solution for office users.

One-Touch Milk Coffee

It supports one-touch preparation of various milk coffee drinks with simple operation, easy for beginners. It precisely controls the milk-to-coffee ratio for a rich, balanced taste, quickly satisfying office workers' instant needs and adapting to the fast-paced office environment efficiently.

Automatic Cleaning

Equipped with an intelligent automatic cleaning function, it automatically cleans the pipelines and brewing components after use without manual disassembly or wiping. It effectively avoids coffee residue and bacteria growth, saves cleaning time, keeps the machine hygienic and ensures safe drinking.

Large Screen Operation

Featuring a high-definition large screen with a simple, intuitive interface and easy operation, it clearly displays drink selections and steps. With no complicated learning required, drinks can be made with a single tap, suitable for office users of all ages and greatly improving the user experience.

Smart IoT

It supports smart IoT connectivity, allowing remote monitoring of device status and consumable levels, as well as one-touch parameter setting. Enabling convenient off-site management and timely replenishment, it ensures uninterrupted coffee supply for offices and highlights smart office efficiency.

Feature
